Federal Consistency Determination
Puerto Rico Coastal Zone Management Program

CZ-2024-0825-021

Installation of new fuel storage tanks in the Aguada Naval Radio Transmitter Facility
Aguada, Puerto Rico

Dear Ms. Dauberman:

The Office of Geology and Hydrogeology completed the initial evaluation for a Federal Consistency Determination and assigned the project the number CZ-2024-0825-021. This application is considered complete, and the evaluation period began on August 21, 2023. Notwithstanding, the following information must be provided before September 15, 2023:

- 1- The proposed project is located within an **A Zone** and **Culebrinas River Floodway** according to the Base Flood Elevation Maps (Advisory Maps) of April 13, 2018. Provide the required analysis and information to evidence that the proposed federal activity is consistent with the Special Flood Hazard Areas Regulation (Planning Regulation Number 13) and applicable rules related to floodplain management.

- 2- Provide information on the measures to be applied to avoid and minimize the damage that storms and hurricanes may cause on the proposed tanks and infrastructure, considering the location of the proposed facilities within the Culebrinas river floodway.
- 3- Complete the required information in the models provided as enclosure for the public notice and coordinate to disclose it according to established federal and state procedures. We are available to help in the edition of the Spanish version.

For the Federal Consistency review purposes, we suggest following schedule:

Activity	Date
Edition and disclosure of the Public Notice and consultation letters	September 13, 2023
Public comments period	September 16 to 31, 2023
Evaluation of received comments and request of additional information from the applicant if necessary	October 2, 2023, to October 11, 2023
Final evaluation	October 9 to 13, 2023
PR Planning Board Session and decision	Before October 20, 2023

For any coordination or assistance, please contact Rose A. Ortiz Diaz at (787) 723-6200 ext. 16012 or by e-mail, ortiz_r@jp.pr.gov.

Thank you for your collaboration with our Program.

Cordially,

Darilyn M. Amador
Acting Director
Office of Geology and Hydrogeology
