

ENGINEERING TECH (0802 Series)

Responsibilities

- Evaluate and assure the quality control efforts of the construction contractor.
- Apply technical knowledge and sound judgement to assist in the resolution of encountered field issues, problems or conflicts.
- Perform complex projects ranging from simple repairs to unique, multi-million state-of-the-art construction involving all engineering disciplines.
- Support the management and administration of complex and challenging construction projects in various geographic locations.

Qualifications

To qualify for the GS-10 level your resume must demonstrate at least one year of specialized experience at or equivalent to the **GS-09** grade level or pay band in the Federal service or equivalent experience in the private or public sector. Specialized experience must demonstrate the following:

- 1) Assisting professionals with design, layout, and execution processes for construction operations and projects;
- 2) Evaluating and assuring compliance of quality control plans for construction projects;
- 3) Making recommendations to resolve problems encountered during construction operations;
- 4) Interpreting construction guidance and specifications for the purpose of monitoring contract compliance.

To qualify for the GS-09 level your resume must demonstrate at least one year of specialized experience at or equivalent to the GS-08 grade level or pay band in the Federal service or equivalent experience in the private or public sector. Specialized experience must demonstrate the following:

- 1) Assisting professionals with quality control plans for construction projects;
- 2) Gathering information to resolve problems encountered during construction operations or projects;
- 3) Interpreting construction guidance and specifications to assist with monitoring contract compliance.

NOTE: This information must be supported in your resume to be considered for the position.
